air new zealand

AIR NEW ZEALAND's DC-10 Series 30 is a brand-new wide-bodied jet that captures all the magnificence and Spirit of the Pacific itself. Linking New Zealand and the South Pacific with Australia, the Orient and North America it is expressly designed to turn Pacific travel into sweet luxury and comfort. The symbol on the tail fin is the Koru which had its place on the sternposts of questing Maori canoes that probed Pacific distances in another time.
